EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the specification:

Applicant's amendment to the specification filed January 27, 2009 has not been entered into the file. Applicant's deletions of numerals "24a", "25a" in the specification does not correct the objection to the drawings issues raised in the previous action mailed October 28, 2008. By deleting these numerals applicant has created confusion in understanding how the apparatus works and the correlation between the specification and drawings is incomplete. It is required that corrections to the drawings adding these numerals be provided.

In the claims:

Claim 35, lines 1 and 2, the sentence "for fuel injection systems of combustion engines, in particular" has been deleted.

Claim 37, lines 1 and 2, the sentence "for fuel injection systems of combustion engines, in particular" has been deleted.

The above changes were done to correct the indefiniteness of the claims do to the recitation of a broad range or limitation("a fuel injection valve for fuel

Art Unit: 3752

injection systems of combustion engines”)together with a narrow range or limitation(“, in particular for the direct injection of fuel into a combustion chamber of a combustion engine”), that falls within the broad range or limitation.

Claim 37, line 21, the phrase “the centre” has been changed to --a center--.

Claim 37 line 22, the phrase --of the fuel injection valve-- has been inserted after the word “axis”.

The above changes were done to provide proper antecedent basis for “a center longitudinal axis” and to clearly define the invention.

3. The following changes to the drawings are required by applicant: In Figure 1, the numeral --24a-- should be entered in to show that it defines together both the coil arrangements --24a’,24a”--. In Figures 4 and 5, the numeral --25a--should be entered in to show both the pole lands --25a, 25b-- in Figures 4 and 5. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to STEVEN J. GANEY whose telephone number is (571)272-4899. The examiner can normally be reached on 9:00-5:00; Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Len Tran can be reached on 571-272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
